Globale inhoud:

This four-day course focuses on both Mac OS X as a directory service client, and Mac OS X Server as a directory server. Cross platform solutions are emphasized in both instances.

Demonstrate your knowledge by passing the Mac OS X Directory Services 10.6 exam. Apple Certified System Administrator (ACSA) 10.6 certification is granted upon successful completion of the Mac OS X Directory Services 10.6, Mac OS X Deployment 10.6, and Mac OS X Security and Mobility 10.6 exams.

The Mac OS X Directory Services 10.6 exam also counts as an elective towards Apple Certified Media Administrator certification.

Invulling:

4 Days course

Specifieke inhoud:

- Accessing the Local Directory Service
- Accessing an Open Directory System
- Accessing an LDAP Server
- Configuring Open Directory Server
- Configuring Open Directory Replicas
- Connecting Mac OS X Server to an Open Directory System
- Integrating Mac OS X Server with Other Systems

What Will You Learn?

- Use network accounts and Kerberos authentication with any common directory service
- Run a robust, scalable directory system using Apple's Open Directory Server
- Use Mac OS X Server to augment an existing directory service infrastructure
